

COMPANY PROFILE

“Create an Experience for the company and also create that same experience in the community. So we can make the world a better place to live in”

Softix Technologies is a Pakistan based software house, serving the local and global clients since 2008. We are specialized in development of ERP and MIS for Manufacturing concerns, Hospitals, Security Organizations, Educational Institutes, Traders and much more. We have highly skilled and experienced professionals who are working day and night to provide their best.

We strive to establish long-term collaborative partnerships with our customers and become their trusted partner. Such partnerships allow us to build dedicated teams, to create and maintain client-specific knowledge, and to seek overall process improvements and efficiency gains over time.

Our vast experience covering a wide range of business sectors enables us to develop OR implement highly flexible ERP products capable of accommodating various business processes in diversified business organizations.

CLOUD BASED COMPUTING

We have a great number of online products to meet the requirements of our customers. We are covering much more industries than ever.
